Claims 1-23 (canceled).

24. (Currently amended) A regenerated cotton plant selected from the group consisting of (1) a plant of a Class 2 *Gossypium* genotype transformed to contain selected foreign DNA and having a phenotype conferred by said foreign DNA by which said cotton plant can be distinguished from naturally-occurring cotton plants, and (2) descendants of said cotton plant having said distinguishing phenotype; wherein said distinguishing phenotype is expression of an insecticidal protein.

25. (Currently amended) A transgenic cotton plant according to claim 24 comprising an insecticide gene under control of a plant-expressible promoter wherein said insecticide structural gene encodes the amino acid sequence of Figure 1 (~~SEQ ID NO:2~~) and is expressed under control of said promoter such that tissues of said plant are toxic to insects.

Please cancel claims 26-46, without prejudice.
